**Jeannie Motherwell**

**Artist Statement**

I am amazed by the images and mysteries of the oceans and skies in changing weather, Hubble-type images of the universe, and my own physicality during the painting process. There's an intimacy to the space in my work but also an immensity. The process I use and the mere physicality of it help me explore spatial complexities that yield marvelous surprises, often carrying me in directions I cannot anticipate. I like to think of my artwork as an 'event' or an 'occurrence'; that is, an action that emerges in the here and now — the subject matter symbolizing the images and mysteries of creation.
